Magento 1.x CE

Abstract

This user manual describes the process of configuring and utilizing Google Cloud PHP Autoloader, a Magento extension for autoloading Google Cloud PHP classes in Magento.

Contents

1 Introduction

1.1 Background

Google Cloud PHP is a suite of PHP packages for integrating with various Google Cloud services.

1.2 Description

Google Cloud PHP Autoloader is a Magento extension for autoloading Google Cloud PHP libraries and dependencies. It is intended to be used with Magento 1.x only, as Magento 2 provides native support for Composer.

2 Configuration

2.1 Fields

2.1.1 General Settings

Enable Google Cloud PHP Autoloader: Disabled by default. Google Cloud PHP classes will not be autoloaded while the extension is disabled.
